Adaptive Enterprise Toolbox:

Next Practices for the Knowledge-Based Economy

by Borys Stokalski, Senior Consultant,
Cutter Consortium

This *Executive Report* identifies the emergent management techniques and concepts that might become the best practices of tomorrow's business. It presents the "heuristics of business innovation" — the proposition that an innovation in management practices will occur as a result of the capabilities offered by modern business applications, pervasive communications networks, and exponentially growing digital traces of the millions of events that take place every day in 21st-century society.
