Applying Road Mapping to Enterprise Architecture and Service-Oriented Architecture

by Bartosz Kiepuszewski, Michal Paluskiewicz and
Borys Stokalski

The central concept of this Executive Report, which will be published in the fall of 2004, is Enterprise Architecture Road Mapping (EARM). This is the discipline of planning the evolution of enterprise architecture in a way that anticipates and enables business changes, and maximizes the opportunities provided by technology innovations in order to improve enterprise agility.
