

# The Hitchhiker's Guide to Enterprise Architecture Roadmapping

by Sebastian Konkol; with contributions from  
Wojciech Ozimek, Bartosz Kiepuszewski,  
and Borys Stokalski, Senior Consultants,  
Cutter Consortium

This *Executive Report* presents a technique that supports the development of the enterprise architecture roadmap. Our goal was to design an agile approach that can be seen as a core process for enterprise architecture management that can be used as is or modified as needed. The report concludes with a review of case studies in which the principles of enterprise architecture roadmapping (EARM) have been successfully adopted.
